

From our regular daily life to cutting-edge technology, Robotics Summer Lab offers an astonishing quest to explore the wonders of robotics through this Amazing Experience.

In cooperation with the Robotics Academy, we have designed this combined English and Robotics summer programme to help younger students learn English while developing the core concepts of problem solving and programming.

This course is ideally suited for children who love to be creative and find their own solutions to problems.

Every day, our students will be able to build their own LEGO robots and use them to solve everyday problems and answer questions. Students will use their creativity to improve on a robot's basic design, all the while learning advanced concepts.

Every week will be packed with fun excursions and exciting challenges designed to test the limits of students' robots. The robots will be navigating their way through mazes, overcoming obstacles and battling against each other.
